**Abstract.** We reviewed the literature for surveys of parasitoid of filth flies in Thailand. We found 5 families, with 9 genera and 14 species identified in Thailand. We describe the ecological niches and biology of common species, including *Spalangia cameroni*, *S. endius*, *S. nigroaenea* and *Pachycrepoideus vindemmiae*.

**Keywords:** pupal parasitoids, synanthropic flies, garbage dump, Thailand
